

Change To Feature Transition App

Supporting ChaRM customers
on the way to SAP Cloud ALM

Change To Feature Transition App

Overview

- Transferring open change documents from SAP Solution Manager to SAP Cloud ALM Features can help to speed up the transition process
 - Reduces manual effort during migration
 - Accelerates the transition to Change and Deployment-Management

Change To Feature Transition App

Objective of the App

- Automated transfer of open change documents including relevant transports
- Avoidance of manual copying
- Consistent data transfer to SAP Cloud ALM

Change To Feature Transition App

4-step process

- Select relevant change documents
- Export the documents as JSON from SAP Solution Manager
- Upload to the Change to Feature Transition App
- Create features in SAP Cloud ALM

Change To Feature Transition App

Upload of change documents

- Export the change documents in JSON format (e.g., via oxando ALM Migration)
- Upload to the Transition App with just a few clicks
- Display of the uploaded documents in an overview table
- Preparation for further processing

Change To Feature Transition App

Project Assignment

- Assign an SAP Cloud ALM project before creating the feature
- Project is mandatory for features
- Selection is made via a drop-down list
- No manual entry of project IDs required

Change To Feature Transition App

Creating Features

- Selection of one or more change documents
- Verification of project assignment
- Option for single or mass transfer
- Automatic creation of features in SAP Cloud ALM
- Display of the feature ID next to the change document

Change To Feature Transition App

Benefits

- Elimination of manual transfer effort
- Centralized and consolidated overview of all uploads
- Faster project and feature assignment
- Early detection of errors and inconsistencies
- Support for mass transfers

Change To Feature Transition App

Result

- Faster migration from SAP Solution Manager to SAP Cloud ALM
- Standardized handover process from Changes to Features
- Higher efficiency in change and deployment management transition
